Cambodia · Available for work

PROFILE

Self-taught software developer, building and shipping since 2020. I've delivered bilingual web apps for local businesses, payment-tracking automation, and desktop products that customers pay for – and hold a BSc in Information Technology from Build Bright University. My process: find a problem worth solving, build the smallest thing that fixes it, ship it, and learn from what breaks.

EXPERIENCE

- 2020 – Present Freelance Software Developer · Cambodia
- Built and sold desktop and web software for small businesses
 - Developed Telegram bots for automated payment and notification tracking
 - Delivered bilingual (Khmer/English) web applications for local clients
 - Packaged and sold a digital product online – first paid software

PROJECTS

- 2023 98 Coffee Menu
Bilingual Khmer/English menu site for a real coffee shop – Firebase backend, live price updates, multi-user admin panel. First paying client.
- 2024 PayTrackBot
Telegram bot that parses ABA and ACLEDA bank SMS notifications and logs every payment to Google Sheets automatically. Runs 24/7 on a VPS.
- 2024 – 2025 MediaGrab
Desktop video downloader sold online as a digital product (CustomTkinter, PyInstaller), later rebuilt as a license-gated web app (Flask, Next.js).

SKILLS

- | | |
|------------|---|
| Languages | Python, JavaScript |
| Backend | Firebase, REST APIs, Flask |
| Bots | Telegram Bot API |
| Desktop | CustomTkinter, PyInstaller, PyArmor |
| Networking | Setup, configuration & troubleshooting (solid basics) |
| Tools | Git, Figma |
| AI tools | Claude, GPT – part of my daily build workflow |

EDUCATION

- 2022 – 2026 BSc in Information Technology · Build Bright University, Cambodia – graduated
- 2020 – Present Self-taught · through real client projects
